Subject: Eastman/Taminco Import Tolerance Transmittal Document
Attachments: Transmittal.docx

Hello Tony,

I want to thank you again for taking the time to meet with us last week. Per our discussion, I have attached the transmittal document we intent to submit with our import tolerance for chlormequat chloride on wheat, barley, and oats. Please let me know if you need any additional information from me to determine if we would be a good candidate for the pilot program for import tolerances. If we do decide to move forward with the pilot program, we are hopeful that the PRIA timing will be reduced since the EU risk assessment will be included. My team would like to make a decision on whether we move forward with the pilot program or the standard PRIA action by the end of this week. It is my goal to have it to EPA as soon as possible. Please let me know what you think.

Regards,
Jessica McLaughlin
